

C245S-A / C345S-A SERIES

CotoMOS® C245S-A/C345S-A

When automotive grade performance and a small package size is required, the AEC-Q101 Certified C245S-A or C345S-A is your best choice. Configured in an industry-standard SOP package, both the 4 pin, 1-Form A C245S-A and the 8 pin, 2 Form A C345S-A feature a low on-resistance of 3Ω-5Ω max. and a low output capacitance of 20 pF nominal, which is necessary for fast switching. In addition, the C345S-A offers two fully-independent Form A channels for further space savings that can be configured in series mode for even higher current switching. Both MOSFET relays are ideally suited to the needs of Battery Management, Data Storage and general Automotive Switching requirements.
